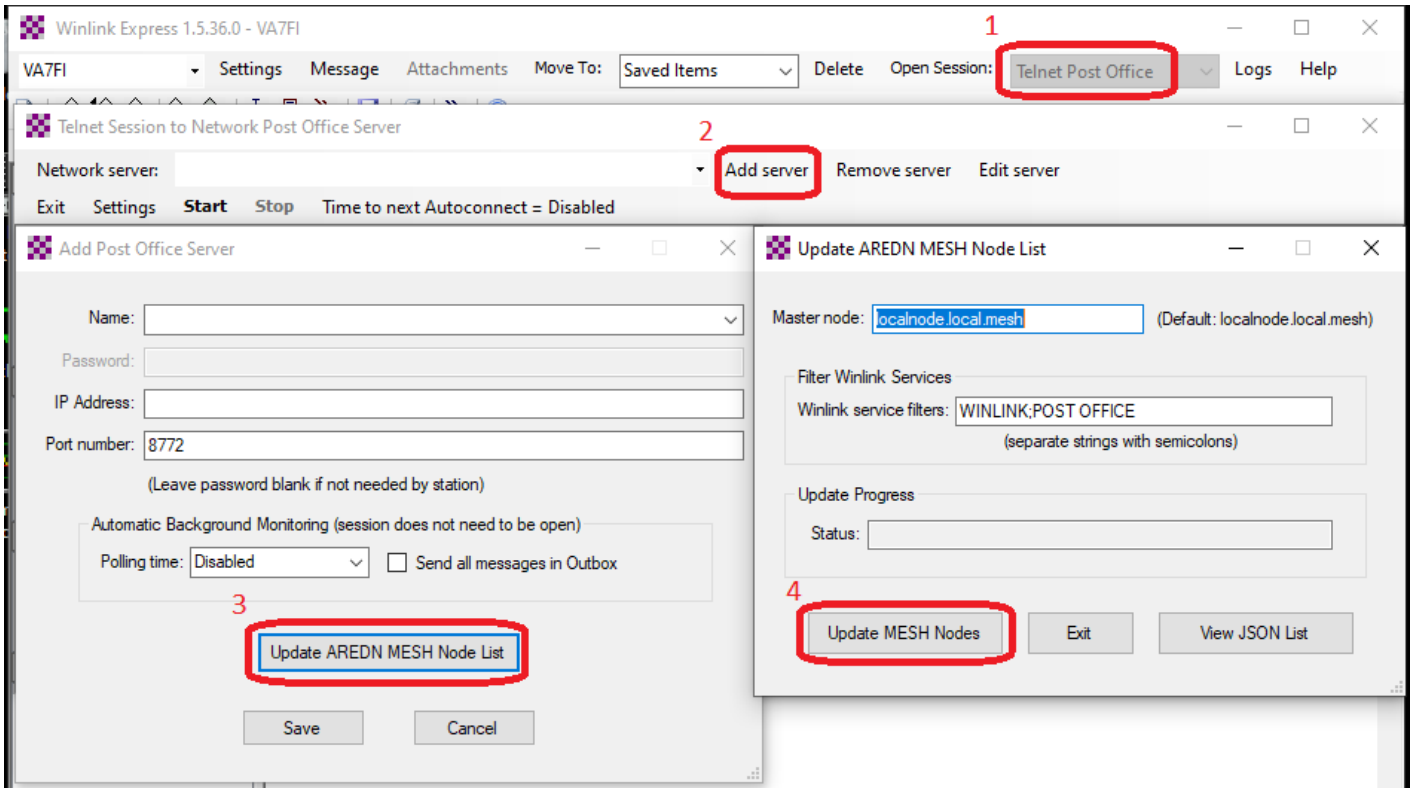
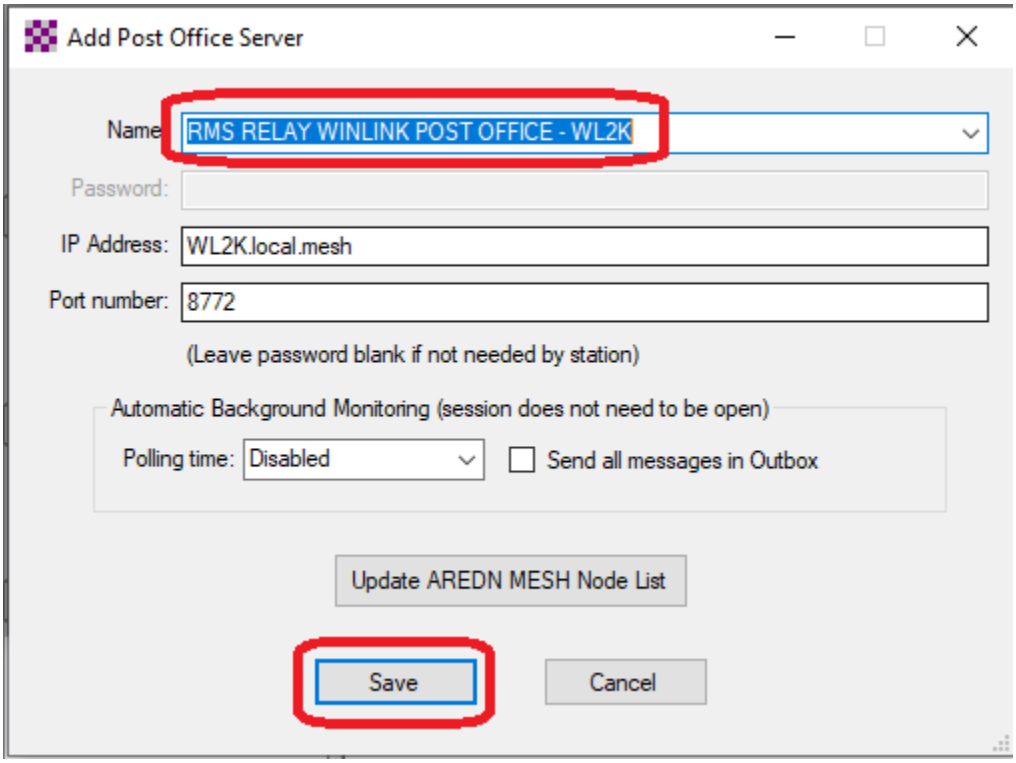
Winlink over AREDN

Devan (VE7LSE), has a Winlink Gateway setup that connects over AREDN. More information from Groups.io.

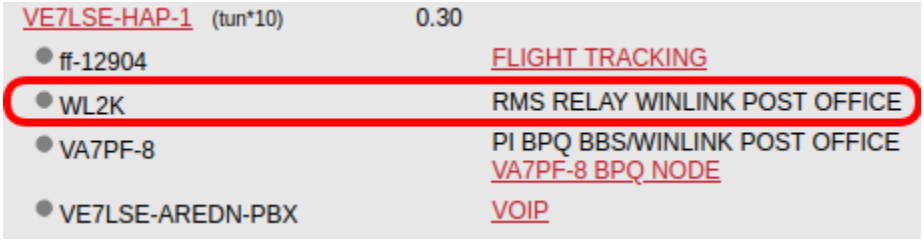
Initial Configuration

1. Open a `Telnet Post Office` Session
2. Click on `Add server`
3. Click on `Update AREDN MESH Node List`
4. Click on `Update MESH Nodes`
5. Click OK on the Success Screen
6. Exit the Update AREDN MESH Node List
7. Select `RMS RELAY WINLINK POST OFFICE - WL2K`
8. Click Save





This will connect to VE7LSE's node:



Sending and Receiving Messages

1. Send message as `Winlink Message`
2. `Post to Outbox`
3. Open `Telnet Post Office` Session
4. Click `Start`

More info from Groups.io.
